

End-customer Success Stories

Distribution + Engineering Projects

Customer

Company profile

- Grupo Cuñado is provider of all materials needed to build a new petro-chemical plant.** In addition, they offer a more **added-value service** for the engineering in charge of the construction site which consists in building a specific **warehouse** next to it and **managing it in an optimal manner.**
- Industry / Employees:** Distribution and Engineering projects / N/B
- Implementation:** Madrid (Spain). 1.000 hours
- Annual revenues:** N/B
- Web site:** <http://www.cunado.com>

The challenge

- Worldwide availability of the ERP** from all construction sites.
- Strict usability requirements in receptions and shipments** of materials in the warehouse.
- Huge product catalogue** with more than 200.000 references.
- Specific needs** for the customer related to civil engineering (isometric management). **Requirement of a very adaptable ERP solution.**

The solution

- Openbravo ERP as the construction site warehouses management solution** with the Engineering users accessing into the system in order to see the **real status of the purchased products.**
- High customization of warehouse management** in order to cover the strict usability customer requirements.
- Development of isometrics management module.**

The results

- Personalization:** ERP solution tailored to their current specific needs and highly scalable for their future needs.
- Easy access:** available ERP solution for all worldwide construction site projects and with very easy access from warehouses infrastructure.
- Always up to date:** OB Network SMB One guarantees that the server has the last patches applied and is "piece of mind".
